

GROW SCHEDULE

Internode 1: Bacterial PH 6,0, No feeding.

Internode 2: PH 6,0, No feeding.

Internode 3: Bacterial, PH 6,0, No feeding.

Internode 4: PH 6,0, No feeding.

Internode 5: Bacterial, Grow Sensation, PH 6,0, total EC 0,7.

Internode 6: CO2 tabs, Bacterial, Grow Sensation, Sweet Jane 1, PH 6,0, EC0,8. First add Growsensation, then Sweet Jane 1

Internode 7: CO2 tabs, Bacterial, Grow Sensation, Sweet Jane 1, PH 6,0, EC 0,9. First add Growsensation, then Sweet Jane 1.

Internode 8: CO2 tabs, Bacterial, Sweet Jane 1, PH 6,0, EC 1,0.

Internode 9: CO2 tabs, Bacterial, Sweet Jane 1, PH 6,0, EC 1,1.

Internode 10: CO2 tabs, Bacterial, Bloom Sensation, Sweet Jane 1, PH 6,0, EC 1,2.

Hereafter gradually raise the EC (0,1 per 4 days) to 1,8. When given two times EC 1,8, gradually lower the EC (0,1 per 4 days) to 1,6. Heighten the PH near the end to 6.4.

During flushing, gradually lower the PH back to 6,0 if the soil is reused. CO2 tabs, Bacterial, Bloom Sensation, Sweet Jane 2 and Guana Extract. First add Bloom Sensation and Guana Extract, then Sweet Jane 2 to the desired EC.
